**FOOD IN EMERGENCIES**

### HOW TO PREPARE:

**Keep Foods That:**
- Have a long storage life.
- Require little or no cooking, water, and refrigeration.
- Meet specific food needs for your family.
- Are not salty or spicy. (will lead to higher water consumption rate.)

**Storage Tips:**
- Keep food in a dry, cool spot.
- Wrap perishable food in plastic and keep in sealed containers.
- Empty packages into air-tight containers for pest protection.
- Write the expiration date on all items, and replace when needed.
- Store a can opener and bottle opener, and get rid of swollen, dented, and corroded cans.

**Calorie Intake:**
- Go by Calories, not serving size.
- People with average activity level need:
  - Males – 2,800+ Calories

  - Children < 13 – 1,440 Calories

- Canned food can be eaten straight out of the can. If you heat it in the can, remove the lid and the label first!

### IF ELECTRICITY GOES OUT:

1. Use all perishable items from the refrigerator, pantry, garden, etc.
2. Use foods from the freezer.
3. Begin to use non-perishable foods and staples.

- Inspect all foods, especially cans, for signs of damage or spoilage before eating.
- Purchase 1 or 2 extra items every time you go to the grocery store to create a stockpile.
