

FIRE

What would you do if a fire started?

- If you are on fire: STOP. DROP. ROLL.
- If your building is on fire: GET OUT, STAY OUT
- Leave your things and save yourself

Stopping a Fire

- To stop a fire, you must remove one of the four elements:
 - Heat: cool the fire
 - Oxygen: smother the fire
 - Fuel/material: remove the source of the fire
 - Chemical reaction: displace the elements

Using a Fire Extinguisher

- Pull the pin. Hold the nozzle pointing away from you
- Aim low. Point the extinguisher at the base of the fire
- Squeeze the lever slowly and evenly
- Sweep the nozzle from side to side

Recovering After a Fire

- Stay out of fire-damaged homes until it is safe to enter
- Be aware of inhalation injuries and seek help if short of breath
- Wash small wounds with soap and water and replace bandages regularly to avoid infection
